

Dear Sir:

I really never listened to the radio in the car as the stations faded in and out. Satellite radio is fabulous!!! I listen to it every time I am in the car now. I enjoy the music, news as well as the weather. In bad weather it is certainly gives me the current information that I need. I strongly support Satellite radio and urge you to reject the NAB's petition 04-160 and to support XM Satellite Radio.

Sincerelly,
Ocllo Malone
